

Rayon Fiber series

~ With natural fibers ~

Resolution for environment issue

Nylon fiber is long used for mascara formulas. However, nylon is concerned as plastic microbeads and rayon is the ONE to introduce as perfect alternative. The raw material of our Rayon Fiber is certified with FSC (Forest Stewardship Council). We provide Rayon Fiber developed by considering SDGs.

Biodegradability

The raw material of our Rayon Fiber is biodegradable and it is excellent material to protect environment.

Result:

More than 60% degradation after 28 days of OECD 301F test

More than 90% degradation within 6 months of ASTM D6691 test

Rayon Fiber × Bincho-tan

We developed natural black Rayon Fiber. The biodegradable Rayon Fiber is mixed with Kishu Bincho-tan whose origin is Ubame oak. This product is perfectly followed SDGs.

* We participate in the “Kigyo no Mori” project in Wakayama prefecture in accordance with our CSR plan for contributing to the community and sustain the technology of Kishu Bincho-tan.
