MAKIMOUSSE

How is it born! MAKIMOUSSE

MAKIMOUSSE is unique water absorption polymer which has powerful thickening property.

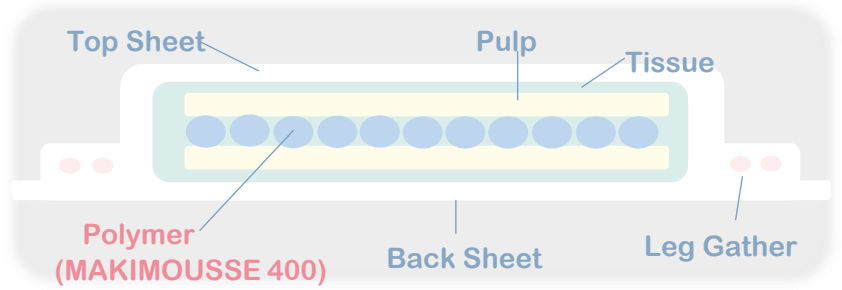

It shows very unique texture by swelling in water.

What do you think about origin of MAKIMOUSSE? It is a baby diaper!

We developed technology to control particle size to be smaller for more cosmetics applications.

Reliable material
Easy to use

The origin of MAKIMOUSSE is used for baby diaper. We introduce MAKIMOUSSE as a reliable product. We do not need to take neutralization process during thickening. We can prevent lumps only by mixing in polyol before thickening. The handling is very simple and easy for anyone.

New born、New creation

New Texture

We have 4 different particle sized grades in MAKIMOUSSE series.

Each MAKIMOUSSE gel gives completely different texture. It is also possible to combine several grades to create new texture.

We can use as we want!

We are happy to help for formula development with new texture.
